

The General Product Safety Regulation (GPSR) will come into effect on December 13, 2024.

Applies to Non-food products in the EU and Northern Ireland

You will be required to meet General Product Safety Regulation (GPSR) requirements in 2024. Source: [European Commission](#)

On **December 13th 2024**, the GPSR will introduce new requirements for most non-food consumer products.

To comply with the regulation, you'll be required to do the following by Dec. 13th 2024:

- Ensure all the products you sell in the EU and Northern Ireland meet existing labelling and traceability requirements.
- Have an EU Responsible Person for those products. Label the products with the contact information of the Responsible Person, the manufacturer, and, if applicable, the importer.
- Label products with the type, batch, or serial number.
- Label products with safety information and warnings, where applicable, in the language of the country of sale.

Additionally, you will be required to display the following information in your online product listings:

- The Responsible Person information and the manufacturer's name and contact details for each product.
- A product picture and any other information needed to identify the product.
- Warning and safety information, in the language of the country of sale.
